AED Life Saving Facts:

- 13% of workplace fatalities are from sudden cardiac arrest. (OSHA)
- The American Heart Association estimates that 20,000 to 100,000 SCA deaths could be prevented each year if defibrillation was readily available. Electrical shock restores a heartbeat and circulation, but to survive neurologically intact, rescue must be swift.
- Defibrillation within the first minute of sudden cardiac arrest can save the lives of up to 90% of its victims. However, with each minute of delay until defibrillation, the survival rate drops by 10% (American Heart Association)

Floor Decals Anti-Slip

These high visibility graphic floor signs provide a constant reminder to your employees about important Workplace Hazard, Safety Requirement and General Notice information details.

Constructed from a high quality adhesive vinyl, we laminate a thick textured vinyl to these signs for added durability as well as slip resistance. The sub-surface printed images provide extended durability and will stand up to heavy pedestrian traffic. The aggressive adhesive will adhere to most smooth, clean and dry floors.

Safety Grade Glo Brite® Signs GLOW

The GLO BRITE® photoluminescent polycoated polyester (glow layer) is designed to exceed requirements for emergency egresses and other safety standards. Designed for safety signage in buildings, marine, rail transportation and military applications, it will provide hours of illumination with a 4-minute recharge time.

Not requiring electricity, these signs clearly mark escape routes and the location of life-saving equipment. The amount of Illuminance, or brightness, depends on the area covered, the distance from the light source and the nature of the room illumination.

Color sections to correspond to the National Fire Protection Associations (NFPA) Hazardous Material Code No. 704M. The color diamond is used, with a numerical scale of 0-4 to indicate the health, fire and instability of special chemicals. The bottom (white) section is used to show the specific hazard (acid, alkali, corrosive, etc.)

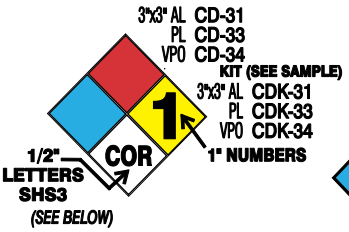

NFPA Color Diamonds

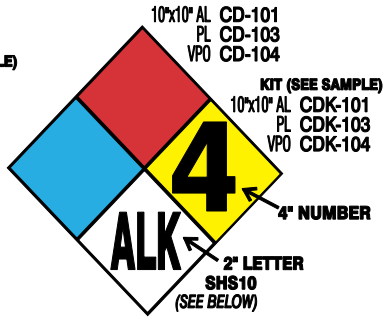

CD- Color Diamonds are supplied without numbers.

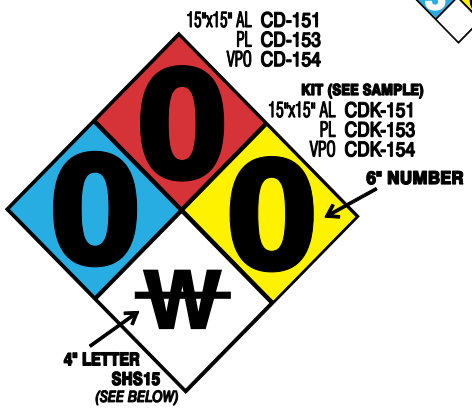

CDK- Color Diamond Kits are indicated with the K in part number and include numbers and letters.

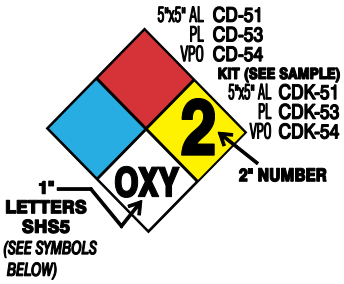

Some states require white numbers on some the color blocks. Please specify color of number when ordering the color diamond KITS

HMIS (Hazardous Materials Identification System) provides clear, identifiable information to employees by standardize chemical information. The HMIS parallels NFPA in color and number coding; however, instead of the NFPA diamond, the HMIS uses a color bar system. HMIS satisfies HCS requirements.

Write-on pressure sensitive labels, provided in rolls. Write in chemical name and check off personal protection.

Conspicuity

DOT-2 Reflective Tape

Require the highest standard in reflectivity on the market? Try our line of Conspicuity reflective tapes. They exceed the requirements of NHTSA (49 CFR 571), and every strip carries the DOT-C2 legal certification for compliance. The modular pattern of reflective prisms allows the tape to be mounted in any position while maintaining reflective performance. Typical brightness of 750+ candlepower. This conspicuity tape meets the industry's highest visibility guidance in wet or dry weather conditions with full reflective strength from distances of 1,000 feet or more. Easy to apply, our tape sticks to a variety of surfaces including fiberglass, aluminum and painted steel (please make sure surface is clean, dry and oil free before application).

- Avoid costly dig-ins to locate buried non-metallic cables and pipelines with detectable underground tape.
- This tape is easily detected with an industrial grade non-ferrous metal detector. While it's highly visible colors make it easy to locate after the dig has begun.
- To install place a length of tape in the excavated ditch above the installation. The tape should be placed 6" to 12" below grade.

Tuff Mark® provides a long lasting solution for marking floors, aisles, walkways and work flow in your facilities. This extra-tough, low profile, easy to apply Floor Marking product is made with heavy duty materials making this tape highly durable, as well as abrasion and chemical resistant.

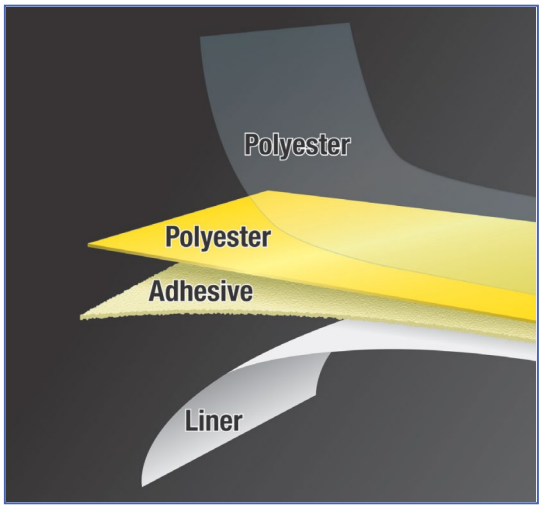

The rigid construction makes this tape easy to install as well as easy to clean and maintain. The aggressive adhesive will bond to most floors making this tape resistant to tearing, wrinkling or lifting even under heavy forklift traffic. Once applied, the low profile design makes this tape a great choice for use in areas with forklift, hand truck or pedestrian traffic. Removes from most floor surfaces cleanly without chipping, tearing or leaving unsightly adhesive residue.

***Tuff Mark® Standards:**

- ANSI Standard Z535.1 for color
- Average dry BPN: 125 (Dynamic slip resistance using ASTM E303-93 (2013) pendulum test method)
- Average dynamic coefficient of friction: Overall average: Dry 0.60 (ANSI A137.1 flooring slip resistance test)
